

Out of the 2265 most frequently used words, 528 were identified as adjectives. However, 393 words were primarily used as adjectives, while the remaining 135 words were different types but could be used as an adjective. For example, the word "gold" is a noun, such as, "The price of gold is very high right now." However, it can also be an adjective, "The gold trims are beautiful."

Because of the multiple meaning of words, the ordering of words were conducted by 1) taking the frequency of only adjective types, then 2) taking the frequency of (adjectives + other type), then finally 3) taking the frequency of (other type + adjectives).
