

Out of the 2265 most frequently used words, 1524 were identified as nouns. However, 1144 words were primarily used as nouns, while the remaining 380 words were different types but could be used as a noun. For example, the word "play" is a verb, such as, "My kids are going outside to play." However, it can also be a noun, "I am going to watch a play."

Because of the multiple meaning of words, the ordering of words were conducted by 1) taking the frequency of only noun types, then 2) taking the frequency of (noun + other type), then finally 3) taking the frequency of (other type + noun).

There can be typos or errors. If you find anything that is incorrect, please email info@knowledgeicon.com. We will do our best to correct everything.

Sr.	Word	Type
1	people	(noun)
